This document is to confirm that the Victrex grades listed above are not expected to contain the substances listed within the AD-DSL Reference List, version 7.0 (June 2023) as published on the International Aerospace Environmental Group (IAEG) website (<u>IAEG - Aerospace and Defense Declarable</u> <u>Substances List</u>)

Some of these chemicals may of course be present at extremely low and normal background levels as typically found in the industrialised world. Wherever possible, quantitative analysis performed has shown measured levels of key elements to be well below the specified threshold.

Further information regarding AD-DSL can be obtained from: <u>http://www.iaeg.com/chemicalrpt/addsl/</u>
